1. NATURE OF BUSINESS

Premier Gold Mines Limited (the "Corporation" or "Premier") was incorporated under the laws of the Province of Ontario on May 29, 2006, and was inactive until August 18, 2006.

Pursuant to the Arrangement, Wolfden transferred certain of its mineral property interests in Ontario and \$2,000,000 cash to the Corporation and each registered holder of Wolfden common shares was entitled to receive one New Wolfden common share and 0.7 of a Premier common share in exchange for each Wolfden common share held by the shareholder immediately prior to the effective date. Effective July 23, 2007 the articles of incorporation for Wolfden were amended to change the name of the Corporation to Zinifex Canada Inc. ("Zinifex").

2. SIGNIFICANT ACCOUNTING POLICIES

The unaudited interim financial statements of Premier have been prepared by management on the basis of the Corporation's continuance as a going-concern and follow the same accounting policies as the most recent annual audited financial statements. The interim financial statement note disclosures do not include all of those required by Canadian generally accepted accounting principles applicable for annual financial statements. Accordingly, these interim financial statements should be read in conjunction with the December 31, 2006 audited financial statements.

Change in accounting policy - financial instruments

In 2005, the CICA issued new accounting standards: CICA 1530, Comprehensive Income, CICA 3251, Equity, CICA 3855, Financial Instruments - Recognition and Measurement and CICA 3865, Hedges. These standards became effective for fiscal years beginning on or after October 1, 2006 and are applicable to the Corporation as of January 1, 2007. The standards do not permit restatement of prior years' financial statements. The new standards increase harmonization with US GAAP and have been adopted as follows:

Financial assets are classified as held-to-maturity, loans and receivables, held-for trading or available-for-sale. The held-to-maturity classification is restricted to fixed maturity instruments that the Corporation intends and is able to hold to maturity. Assets classified as held-to-maturity or loans and receivables are accounted for at amortized cost. Held-for-trading assets are recorded at fair value with realized and unrealized gains and losses reported in net income. The remaining financial assets are classified as available-for-sale and will be recorded at fair value with unrealized gains and losses reported in a new category of the balance sheet under shareholders equity called other comprehensive income;

Financial liabilities are classified as either held-for-trading or other liabilities. Held-for-trading liabilities are recorded at fair value with realized and unrealized gains and losses reported in net income, and the remaining financial liabilities are classified as other liabilities and accounted for at amortized cost.

Upon adoption of these new standards, the Corporation designated its cash and cash equivalents and long-term investments as held-for-trading which are measured at fair value. Accounts receivable are classified as loans and receivables, which are measured at amortized cost. Accounts payable and accrued liabilities are classified as other financial liabilities and measured at amortized cost. The Corporation had no financial instruments available for sale during the nine months ended September 30, 2007. Changes in the fair value of the Corporations cash and cash equivalents and long-term investments are included in income each period.

During the period, a total of 1,150,000 stock options were granted to consultants of the Corporation. All of the 1,150,000 options issued during the period had vested by September 30, 2007.

The Corporation applies the fair value method of accounting for all stock based compensation awards and accordingly, \$1,069,595 was recorded as compensation for the 1,150,000 stock options that vested during the period.

For purposes of the options granted, the fair value of each option was estimated on the date of grant using the Black-Scholes option pricing model, with the following assumptions: dividend yield of 0%, expected volatility of 65%, risk-free interest rate of 3.75%, expected life of 1 to 5 years.

The following table reflects the continuity of contributed surplus relating to stock options issued and vested as at September 30, 2007:

10. LOSS PER SHARE

The basic loss per share is computed by dividing the loss for the period by the weighted average number of common shares outstanding during the period. Fully diluted loss per share is the same as basic loss per share. The effect of common share purchase options and warrants on the net loss is not reflected as to do so would be anti-dilutive.

The following table sets for the computation of basic and diluted loss per share:

<u>Numerator:</u>		
Net loss	(1,709,968)	(1,101,563)
